Sprint 0 - Setup	
Week 1 – 1st July to 7th July	**End Goals**
- Setup development environment - Code basic project structure - Prepare report and document structure - Implement determined functionality - Review user stories	- Project functionally implemented enough for individual development - Functionality of prototype redesigned - Report 1.0 written

Sprint 1 - Coding	
Week 2 – 8th July to 14th July	**Week 3 – 15th July to 21st July**
- Major UI components implemented - Toolbar to switch between upload, list view, spreadsheet, pairing - Algorithms can run multiple times - Save state and load state	- Test different colour schemes - Implement moving between views for data options - Flow between all views as much as possible - Modifying data - Spreadsheet view details on each option
End Goals	
- Fully functional system minus testing - Not pretty but works as best as we expect - Reports 1.1, 1.2 done	

Sprint 2 – Testing and improving	
Week 4 – 22nd July to 28th July	**Week 5 – 29th July to 4th August**
- Individual testing on multiple datasets - Randomly generated, timed, output compared - Note any changes needed	- Develop feedback form for testing for industry partner - Make any changes we noticed would be nice during testing
End Goals	
- Finalised current state of system - Perform official testing with industry partner on real sample - Get feedback and note improvements – use to develop plans for phase 2 - Reports 1.3,1.4,1.5 (test feedback)
